

The IWA Timeline:

Iowans have already tried, tested, and approved the concepts of the IWA. In 2010, the IFC implemented the HUD-funded Iowa Watersheds Project (IWP) in five watersheds across the state. As the IWP enters into its final year, over 65 built practices including ponds, terraces, and wetlands will be completed. Iowans are now seeing the benefits of these structures.

“Watershed projects not only provide protection against soil loss, but also provide an opportunity to enhance wildlife habitat.”

—Josh Batterson, *Davis County Quail Forever*

“[The] project has created jobs and outside income for our small communities... The structures have increased the value of ag land, not only for the landowners, but for those downstream as well.”

—*Soap Creek Landowner*

“Structures have provided significant savings in federal, state, and local road and bridge maintenance costs to our county.”

—*Davis County Supervisor*
